

Web Design Intern (2 months)

An exciting new UX/UI internship at a young company that is directly making an impact on the digital future of small businesses across Tanzania.

The company

Lateral Labs is a digital agency based in Dar-es-Salaam since 2017. We envision a future that is driven by digital technology. Our services include digital strategy, design, operations and product development for small businesses across sectors.

Lateral Labs has worked for hundreds of unique clients over 5 years on a range of projects, including brand conceptualization, website design-development, and social media management.

The role

We're now looking for a young, independent, and detail-oriented Web Design Intern for our pay-as-you-go website service, [Chapa Link](#). This individual will create website layouts for a wide range of customers while learning about core skills applicable to any job.

Reporting to: Director

Key skills:

1. Expertise - You have prior UX, UI and general web design experience.
2. Communication - You regularly use phone, email and some online tools to work remotely.
3. Independence - You are able to get things done without supervision.
4. Time management - You are able to propose and manage your own schedule.
5. Creativity - You regularly review your own and other work for continuous improvement.

Benefits:

- Fixed term internship contract of 2 months with pay.
- Flexible hours working from anywhere you can find an Internet connection.
- Room to grow across the Digital services and agency spectrum.

Apply Today

Please share your UX/UI/Web Design portfolio and a 1-page resume to jobs@lateral.co.tz, and we will give you a call if we see an opportunity to work together.
